

The Library Support Staff Employees' Union (CULEU) joins with the Concordia Student Union and other labour unions on campus to call for transparency and accountability from Concordia's Administration.

CULEU's overriding concern in our workplace is that University and Library Administration remain accountable for decisions, take responsibility for commitments, and respect collectively bargained agreements. We believe this is the basis for labour relations in a unionized environment. We believe that the principles of accountability and transparency should extend to all stakeholders of our University and so, as the University now moves into a period of re-investment, we call on University administrators to prioritize students, staff and faculty at every point in the decision-making process.

In solidarity,

CULEU
